

PROGRAMME/PROGRAM

Toutes les heures sont indiquées dans le fuseau horaire de Montréal (EST, UTC-05:00).

All times are listed in Montreal's time zone (EST, UTC-05:00).

POUR ACCÉDER AUX LIENS, INSCRIVEZ-VOUS GRATUITEMENT À L'ÉVÉNEMENT / TO ACCESS THE LINKS, REGISTER FOR FREE TO THE EVENT

JEUDI, 4 FÉVRIER / THURSDAY, FEBRUARY 4

9:15-9:30 Accueil et introduction / Welcome and introduction

9:30-10:15 Table ronde / Round table 1 - **Timbre and orchestration I**

- Aurélien Antoine, Philippe Depalle, and Stephen McAdams (McGill University), “**Harnessing the Computational Modelling of the Perception of Orchestral Effects for Computer-Aided Orchestration Tools**”
- Stephen McAdams, Meghan Goodchild, Alistair Russell, Beatrice Lopez, Kit Soden, Er Jun Li, Alfa Barri, Shi Tong Li, and Félix Baril (McGill University), “**The Orchestration Analysis and Research Database (Orchard)**”
- Landon Morrison (Harvard University), “**Computer-Assisted Orchestration, Format Theory, and Constructions of Timbre in New Media Culture**”
- Lindsey Reymore (McGill University), “**Instrument Qualia, Timbre Trait Profiles, and Semantic Orchestration Analysis**”

10:15-11:00 Table ronde / Round table 2 - **Timbre and orchestration II**

- Lena Heng and Stephen McAdams (McGill University), “**Timbre’s function in perception of affective intents. Can it be learned?**”
- Erica Y. Huynh (McGill University), Joël Bensoam (IRCAM), and Stephen McAdams (McGill University), “**Bowed plates and blown strings: Odd combinations of excitation methods and resonance structures impact perception**”
- Han-Na Kim (University of Toronto), “**Timbre Saturation for Chamber Orchestra**”
- Jason Noble (McGill University), “**A case study of the perceptual challenges and advantages of homogeneous orchestration: fantaisie harmonique (2019) for two guitar orchestras**”

11:30-13:00 **Atelier du Forum IRCAM** avec / **IRCAM Forum Workshop** with Carmine Emanuele Cella (orchestration assistée par ordinateur et Orchidea / computer-assisted orchestration and Orchidea)

14:00-15:30 **Panel de compositeurs / Composer panel 1**: Linda Bouchard, Carmine Cella, Zosha Di Castri, James O'Callaghan

- James O'Callaghan, “**Alone and unalone: conceptual concerns in simultaneous headphone and speaker diffusion**”
- Carmine Cella (University of California, Berkeley, CNMAT)
- Linda Bouchard (Concordia University, residency at Matralab), “**Live Structures / Structures vivantes**”

VENDREDI 5 FÉVRIER / FRIDAY, FEBRUARY 5

9:30-11:00 **Atelier du Forum IRCAM** avec / **IRCAM Forum Workshop** with Thibaut Carpentier (spatialisation / spatialization)

11:30-12:15 Table ronde / Round table 3 - **Spatialization, virtual reality, and augmented reality**

- Amy Brandon (Dalhousie University), “**Composing for AR space: creating interactive spatial scores for the METAVision headset**”
- Matthew D. Gantt (Rensselaer Polytechnic Institute), “**Sound and Virtuality: Creative VR, Ambisonics and Expanded Composition**”
- Andrea Gozzi (SAGAS—University of Florence), “**Listen to the theatre! Exploring Florentine performative spaces**”
- Florian Grond and Wieslaw Woszczyk (McGill University), “**Exploring the possibilities of navigating and presenting music**”

performances with a 6DoF capture system”

- Rob Hamilton (Rensselaer Polytechnic Institute), “Virtual Instrument Design for the 21st Century”

12:15-13:00 Table ronde / Round table 4 - Spatialization, Spat, and SpatGRIS

- Michael Century (Rensselaer Polytechnic Institute), “Performance-demonstration of Pauline Oliveros’s Expanded Instrument System for HoA using Spat”
- Nicola Giannini (Université de Montréal, CIRMMT), “*Eyes Draw Circles of Light*, acousmatic piece for dome of speakers”
- Jack Kelly (McGill University), “SPAT tools for presence research in immersive music reproduction”
- Robert Normandea (Université de Montréal), “ControlGRIS/SpatGRIS3: Spatialization tools developed at UdeM”
- Diego Quiroz (McGill University), “Gestural Control for immersive recordings using Leap Motion for SPAT:Revolution”

13:30-14:15 Table ronde / Round table 5 - Spatialization, sound art, and immersive experience

- Jeffrey Boyd, Friedemann Sallis, Martin Ritter (University of Calgary), “The hallucinogenic belfry: analyzing the first forty measures of Keith Hamel’s Touch for piano and interactive electronics (2012)”
- François-Xavier Féron (STMS Lab [CNRS, Ircam, Sorbonne Université]), Cédric Camier (Saint-Gobain Recherche, CIRMMT), Catherine Guastavino (McGill University, CIRMMT), “The sound centrifuge: spatial effects induced by circular trajectories at high velocity”
- Catherine Guastavino (McGill University, CIRMMT), “Spatial sound art in public spaces”
- Laurie Radford (University of Calgary), “Getting into Place/Space: The Pedagogy of Spatial Audio”
- Nadine Schütz (Artistic Residency IRCAM), “Land Sound Design” and “Composing with Echoes”

14:15-15:00 Table ronde / Round table 6 - Composing timbre and space

- Monica L. Bolles, “Orbits: An exploration in spatial audio and sonification”
- Dongryul Lee (University of Illinois at Urbana-Champaign), “A Thousand Carillons: Acoustical Implementation of Bell Spectra Using the Finite Element Method and Its Compositional Realization”
- Anésio Azevedo Costa Neto (Instituto Federal de São Paulo—IFSP / Universidade de Brasília / IDMIL—McGill University), “Cerrado—Applying spatialization techniques to expanded perceptive fields”
- Marlon Schumacher and Núria Giménez-Comas, “Sculpting space”

SAMEDI 6 FÉVRIER / SATURDAY, FEBRUARY 6

Symposium iX — Son & Immersion / Sound & Immersion

We are pleased to co-present the Symposium iX organized by the Société des arts technologiques (SAT) on February 6, 9:30-3:00 EST. This 7th edition of the Symposium iX, dedicated to immersive sonic experience, will be presented on the Hub Satellite, a new web VR platform developed by the SAT. While access to the web platform is limited to a small audience (already sold out), the events will also be streamed on [Vimeo](#) for all Forum participants.

Nous sommes heureux de co-présenter le Symposium iX organisé par la Société des arts technologiques (SAT) le 6 février, de 9h30 à 15h00 HNE. Cette 7ème édition du Symposium iX, dédiée à l'expérience sonore immersive, sera présentée sur le Hub Satellite, une nouvelle plateforme de RV web développée par la SAT. Bien que l'accès à la plateforme web soit limité à un petit public (déjà complet), les événements seront également diffusés en streaming sur Vimeo pour tous les participants du Forum.

Programme / Program

9:30-9:40 Présentation du Metalab, laboratoire de recherche de la SAT / Presentation of Metalab, SAT research laboratory

9:40-10:15 Projet Bretez, archéologie de paysages sonores / Bretez project, archeology of soundscapes

10:15-11:30 Navigation à 6 degrés de liberté dans l’Orchestre Symphonique de Montréal / 6 degrees of freedom navigation in the Montreal Symphony Orchestra

11:30-12:15 Rendu de scènes audio spatiales hétérogènes avec SATIE / Rendering heterogeneous spatial audio scenes with SATIE

12:15-13:30 Auralisation en temps réel avec vaRays / Real-time auralisation with vaRays

13:30-15:00 Présentation des œuvres immersives et projets sélectionnés / Presentation of immersive works and selected projects

JEUDI 11 FÉVRIER / THURSDAY, FEBRUARY 11

9:30-11:00 Atelier du Forum IRCAM avec / IRCAM Forum Workshop with Jean-Louis Giavitto and José Miguel Fernández

11:30-13:00 Atelier du Forum IRCAM avec / **IRCAM Forum Workshop** with Simone Conforti

13:30-14:15 Table ronde / Round table 7 - **La musique électroacoustique, l'interprétation et le multimédia [FR]**

- Denis Beuret, “**Ensemble virtuel, un programme qui groove**”
- Emilie Fortin and Sophie Dupuis, “**Reconceptualiser une œuvre interdisciplinaire: Known Territories 2.0**”
- Ludovic Landolt, “**Musique Éternelle - Bourdon et occurrences harmoniques des cloches**”
- Jacques Rémus (Ipotam Mécamusique), “**Les Thermophones, récentes évolutions et spatialisation**”
- Roxanne Turcotte (CMCQ SMCQ), “**Les oiseaux de Nias**”

14:15-15:00 Table ronde / Round table 8 - **Interactivity and multimedia in composition**

- Carlos Delgado, “**Real-time Gestural Control of Sound Synthesis, Spatialization, and Video Effects Parameters**”
- Ben Neill (Ramapo College of New Jersey), “**Fantini Futuro**”
- Marcel Zaes (Brown University), “**#otherbeats: Resisting the Grid — Performing Asynchrony**”
- Tiange Zhou (UC San Diego), “**LUX FLUX: Design sound and light work in Max/Msp through DMX**”
- Ofer Pelz and Matan Gover (CIRMMT), “**Sound Tracks: An interactive video game composition**”

VENDREDI 12 FÉVRIER / FRIDAY, FEBRUARY 12

9:30-11:00 Atelier du Forum IRCAM avec / IRCAM Forum Workshop with Philippe Esling (**orchestration assistée par ordinateur et IA / computer-assisted orchestration and AI**)

11:30-13:00 Panel de compositeurs / Composer panel 2 : Sasha Blondeau, José Miguel Fernández, Jean-Luc Hervé, Philippe Leroux, Georgia Spiropoulos [FR]

13:30-14:15 Table ronde / Round table 9 - **Composers from the McGill Digital Composition Studio**

- Omer Barash, **Mit Groys Kheshek** for cello and electronics
- Joy Blanchard, **Prelude 3** for violin and electronics
- Xue Han
- Jonas Regnier, **Compulsion-Spirale**

14:15-15:00 Table ronde / Round table 10 - **Composing with technology**

- Taylor Brook (Columbia University), “**Agency and Meaning of Computer-Generated Music in Virtutes Occultae**”
- Christopher Chandler (Union College), “**The Generative Sound File Player: A Corpus-Based Approach to Algorithmic Music**”
- Louis Goldford (Columbia University), “**Assisted Orchestration, Spatialization, and Workflow in Two Recent Compositions**”
- Christopher Trapani, “**The augmented orchestra: Spinning in Infinity**”
